

Images in Curved Mirrors

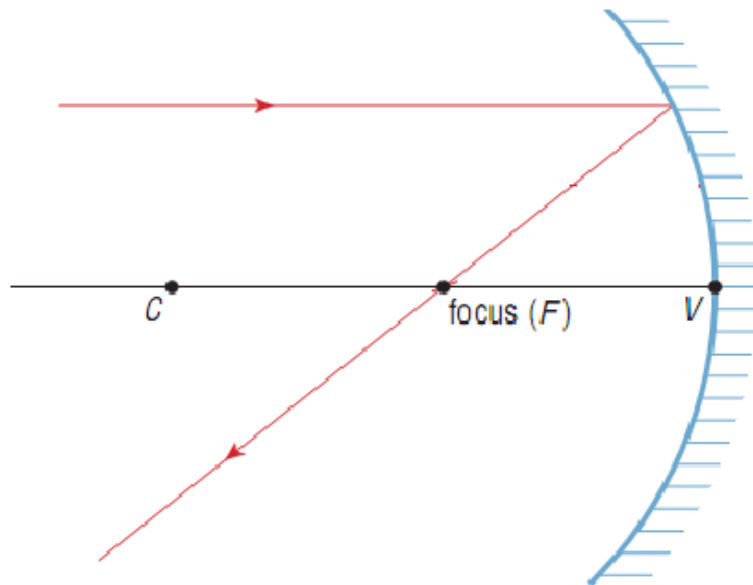

Use the following terminology to label the two diagrams below.

Terminology: concave mirror, convex mirror, centre of curvature, principal axis, vertex, focus

Concave or Converging Mirror

Include the 4 types of rays used for finding an image in a concave mirror. Be sure to include a brief description. The first ray has been drawn for you.

Convex or Diverging Mirror

Include the 3 types of rays used for finding an image in a convex mirror. Be sure to include a brief description. The first ray has been drawn for you.
